

STAIR-

Draw lines between the stars to create constellations.

UNIFER

Mission 

Exosky!

Page Overview 

From NASA's data on extrasolar objects,
we visualize the celestial sphere seen from extrasolar objects.

Users connect the stars in the celestial sphere.
Create your own constellations with your own hands.

You can share the constellations on the Internet.
Interactive exchange platforms are also available.

Future Outlook 

All 88 constellations in the entire sky seen from Earth, even from the perspective of another planet.

Restore constellations that have disappeared in the past and display them.

Hold a contest for user-created constellations to stimulate space education.
